

# Introducing The New 360 Portagoal

**Harrod Sport's new 360 Portagoal range has been developed in conjunction with Premier League Football Coaches.**

#### Features:

- The main goal frame is manufactured from the latest Harrod Sport 4G Aluminium football goal section with a unique side frame that contours up and over the wheels mounted in the side frame.

#### Specification:

- The 360 Portagoal is protected by Registered Design.
- Sold complete with bespoke net.
- Harrod Sport 4G goals are protected by Patent Pending GB1909105.7
- Net supports are manufactured from Ø31.8 pre-galvanised steel and then powder coated white for extra corrosion resistance and attractive appearance.

- The wheels are large Ø260 cellular swivel wheels suited for easy manoeuvrability on natural grass or artificial turf pitches.
- The rear wheels are fitted with brakes to prevent any movement in play.
- Optional Wheel Protection Pads are available and are manufactured from 25mm Chip Foam covered with hard wearing PU coated nylon and hook & loop securing straps. The pad (Harrod Sport code: FBL-920) covers the wheel and side frame within immediate vicinity of wheel and sits 25mm above the playing surface. Wheels still move freely with the pads fitted.
